

DOCULUS LUMUS®

THE MOBILE DOCUMENT CHECKING DEVICE

With Doculus Lumus® it only takes 30 seconds to examine a document and to determine whether a falsification is at hand. Experienced document specialists know how to detect a manipulated document. No matter if you are a border guard, security printer, customs official or document trainer. Doculus Lumus® is your reliable, robust tool to examine passports, ID cards, bank notes or another official document.

See the Truth Inside in less than 30 Seconds!

WHY YOU SHOULD CHOOSE DOCULUS LUMUS®

Experienced document specialists know what they need to look out for. Often, however, the place where fake documents are analyzed more precisely, is an office far away from the border posts. Prior to this, fake documents must therefore be identified by the front lines at the border, on the motorway, on the train or at the airport. Usually only 30 seconds remain for the examination of a document and to decide whether a fake is present or not.
